WHAT IS THE SBC CRICKET PLAYBOOK?

The SBC Cricket Playbook is a step by step conversation guide around designing and planning any behaviour change initiative.

The playbook takes on a practitioners perspective to SBC, focusing on the gap between knowledge and action. The SBC Cricket acronym in Urdu captures the key steps for designing any SBC intervention, with the broader idea to make this an interactive, fun and quick activity, that can be done within 45 mins, individually or in a group, from start to finish. The playbook helps you identify micro-behaviours and generate solutions around them.

The SBC Cricket Playbook Kit Includes:

- | | |
|--|---|
| 1 Scoreboard - used for running a SBC challenge with stakeholders and coming up with solutions that can be tested and implemented | 2 Prompt Cards - designed for ease of filling out different sections in the scorecard |
| 3 BCT Poster - Prompts for solutions and ideation | 4 Facilitator Guide - Instructions for facilitators on how to use the SBC Playbook and reference resources |

WHEN TO USE IT?

For SBC Teams this playbook is a conversation starter on anything to do with behaviour change. It's a great tool for meetings, facilitated sessions and group discussions, within UNICEF and outside UNICEF, with stakeholders and partners.

The playbook can be used in a variety of settings ranging from presenting a behaviour change concept to your manager, decision meetings, planning with stakeholders, strategy, present and pitch SBC project concepts, new project design, & designing a SBC intervention/campaign.

HERE ARE SOME USE CASES:

- You're having a teams meeting for an upcoming SBC campaign and need a starting point to identify your audience and generate ideas before engaging any SBC communication firm.
- You are meeting a government partner and need to design an upcoming SBC campaign together?
- You need to design a strategy around SBC with your section?
- You would like to pitch a SBC concept idea to your Section or SBC Manager?
- You would like to engage your field teams to co-create an SBC intervention together.

Note: This playbook is designed to get you started on a behaviour change plan and doesn't undermine the importance of in-depth work required at the backend or after setting up a SBC plan.

WHAT IS SBC?

Social and Behavior Change (SBC) is a systematic and evidence-based approach to understanding and influencing the behaviors, attitudes, and social norms of individuals and communities. It is often used in public health, development, and communication to promote positive changes in behaviors and to address various social issues. SBC strategies are designed to bring about desired changes in people's actions, beliefs, and attitudes by using a combination of communication, education, and community engagement.

WHAT IS SBC IN THE CONTEXT OF UNICEF'S WORK?

UNICEF incorporates Social and Behavior Change (SBC) strategies to address a wide range of issues affecting children and their communities. Here's how UNICEF applies SBC in its work:

Child Health and Nutrition:

UNICEF employs SBC to promote essential child health practices such as immunization, exclusive breastfeeding, and proper nutrition. Through targeted communication campaigns, community mobilization, and education programs, UNICEF seeks to change behaviors and beliefs related to child health, reducing child mortality and improving overall well-being.

Education:

In the context of education, UNICEF uses SBC to increase school enrollment, attendance, and retention, particularly among marginalized and vulnerable populations. SBC strategies may involve community outreach, awareness campaigns, and advocacy efforts to address cultural and social barriers to education.

Child Protection:

UNICEF employs SBC to combat child exploitation, abuse, and child marriage. By raising awareness, advocating for policy changes, and working closely with communities, UNICEF seeks to change social norms and behaviors that perpetuate these harmful practices.

Water, Sanitation, and Hygiene (WASH):

UNICEF promotes proper hygiene practices and access to clean water and sanitation facilities in communities around the world. SBC plays a crucial role in educating communities about the importance of handwashing, safe sanitation, and clean water sources to prevent diseases and improve overall health.

Emergency Response:

In humanitarian emergencies, UNICEF utilizes SBC to ensure that affected communities receive essential information and adopt life-saving behaviors. This can include communicating about safe shelter practices, hygiene, and access to clean water during crises.

Gender Equality:

UNICEF works to promote gender equality and combat gender-based violence through SBC efforts. These initiatives aim to change attitudes and behaviors that perpetuate gender discrimination and violence against children, particularly girls.

Advocacy and Policy Change:

UNICEF often engages in advocacy efforts that leverage SBC to influence policy changes at local, national, and international levels. This can involve mobilizing communities and stakeholders to advocate for children's rights and well-being.

Community Engagement:

A fundamental aspect of UNICEF's approach is involving communities in the planning, implementation, and evaluation of programs. SBC efforts are often community-led, ensuring that interventions are culturally appropriate and responsive to local needs and contexts.

Monitoring and Evaluation:

UNICEF conducts rigorous monitoring and evaluation of its SBC programs to assess their impact and make data-driven improvements. This ensures that resources are effectively used to achieve desired outcomes.

THE SBC PLAYBOOK FOLLOWS THIS APPROACH:

Define Behavior: Clearly articulate the specific behavior you intend to change or promote. This step sets the foundation for your intervention by identifying the target action.

Who/What/Where/When: Identify the key elements associated with the behavior, including the individuals or groups involved (Who), the circumstances or conditions (What), the location or context (Where), and, if relevant, the timing (When) of the behavior.

Identify Barriers: Explore and understand the obstacles, challenges, or factors that currently hinder or prevent the desired behavior from occurring.

Design Solutions: Develop strategies and interventions to address the identified barriers. Utilize a variety of behavior change techniques and approaches to encourage the desired behavior.

Test: Create a plan for pre-testing your intervention before full-scale implementation. This involves pilot testing to assess the feasibility and effectiveness of your proposed solutions in a smaller, controlled setting.

Results: Plan how you will evaluate the outcomes of your intervention. Define the metrics and methods you'll use to measure the impact of the behavior change efforts and gather data to assess the success of your intervention. This can be done through surveys, observations, or reporting tools to determine whether the behavior has improved. Results provide valuable insights into the success of the intervention and can inform future behavior change strategies.

HOW IS THIS RELATED TO SBC & BS?

The SBC Cricket Playbook is embedded with various Behaviour Science & Behaviour Change models and has been developed using the following approaches -

Behaviour
Change Drivers

SEM Model
